

SAUSAGE

APPLICATIONS

UNLIMITED POSSIBILITIES

Our machine portfolio covers everything from cooked and dry sausage to fresh sausages and clipped products. We offer cutting-edge technology that is renowned for its high performance and precision. Our systems provide precise weight control and reliable operation to ensure the highest product quality at all times.

- › Processing of a wide variety of sausage types, casing types, and calibers
- › Flexible technology for changing product requirements
- › Expert advice to help you find the right machine

THE RIGHT TECHNOLOGY FOR EVERY APPLICATION

To ensure the highest efficiency, automation, and simplicity in your production process, we offer flexible solutions for a range of operations, including **filling, grinding, loading casings, changing casings, portioning** and **linking, cutting, loading** and **hanging** your products. Through simple adjustments and conversions, production lines can be transformed into versatile assets.

Customized technology. Every business is unique, which is precisely why we develop machines and attachments tailored to your specific needs.

High degree of automation. Our solutions simplify your daily work and reduce staffing requirements. They make production more efficient and hygienic while preventing pressure marks and contamination.

Maximum flexibility. Our modular system allows you to flexibly expand your production at any time. Whether you want to launch a new product, modernize your processes, optimize your operations, or increase your capacity, our system will keep you one step ahead.

- › Highest precision in terms of weight and length
- › Leading linking technology for high reproducibility of results and a consistent product image
- › Semi- or fully automatic casing changes maximize casing yield in the production process
- › High output

YOUR PRODUCT – OUR SOLUTION

Always at your side

As your partner in the food industry, we deliver more than just technology. Our filling, portioning, forming and loading systems enhance efficiency, automation, flexibility and product quality – from the small-scale to the global industrial customer.

Our machines process a wide variety of materials with the utmost care and weight accuracy, including but not limited to dough, meat, dairy, vegan alternatives, and non-food products.

What sets us apart in the industry is that we listen, understand your challenges and develop modular solutions that grow with you and your needs. Our goal is to achieve the perfect balance between technology, consulting, and on-site service, allowing you to focus on what truly matters: your product.
